Product Change Notification

Change Description

The Hexapod series H-840.D2 and H-840.G2 are being discontinued.

Impact and Reasons

The H-840.x2 hexapod was replaced by the successor H-840.x2i. Existing H-840.x2 customers looking for a replacement should consider the new H-840.x2i series.

The reliability and life time of the hexapod was improved with the successor using brushless motors. The shape of base and top plate was adapted to the design rules of the standard hexapod series.
