

Product Change Notification

H-811.I2 / H-811.I2V / H-811.S2 / H-811.F2

Change Description

Boring vent holes into the strut sleeves of the H-811.

Impact and Reasons

In order to optimize the flow behavior of the air entering and leaving the hexapod strut, vent holes are bored into the upper area of the strut sleeve.

Old version of H-811.I2

New version of H-811.I2

Recommended Action

Customers should take into account that the bore holes are by no means intended to provide access to the interior of the strut.

Special Considerations

The appearance of the hexapod is different (see photos above).
